Safari COVID-19 Safety Plan

We’re all trying to feel our way through returning to our lives safely, and BRMC is no exception. With that, we’ve established some protocols for all of our programs to make sure everyone stays safe. All participants must take their temperatures each morning, and stay home if they’re not feeling 100%. Also, we are not able to take any participants who have come into contact with someone infected by Covid-19 unless they’ve gone through at least a 14-day post-contact quarantine.

Bull Run Mountains Conservancy’s 21st Annual Halloween Safari will take place this year with some minor adjustments. This year, the event will be held at Leopold’s Preserve (16290 Thoroughfare Rd Broad Run, VA 20137). We will have a COVID-19 safety plan in place to ensure that all participants and volunteers can enjoy the event safely and without worry. In order to do so, we ask that all participants adhere to the following guidelines:

- Due to limited parking, we ask that guests arrive no earlier than approximately 10 minutes prior to their scheduled time.

- Guests will queue up based on their registered time slot and be spaced 10 feet apart from the other queues.

- There will only be 4 queues lined up at any given time. Volunteers will be directing groups based on their time slots. If their time slot is not yet queued up, guests should remain in their vehicles.

- Guests will be asked to remain with their queue for the duration of the night.

- Face coverings are required to be worn for the duration of the event.

- Once you have completed your trail walk, we ask that guests exit promptly.

To ensure that everything runs smoothly, queues will be along the fence closest to Thoroughfare Road at the East parking and spaced at least 10 feet apart. There will only be room for four queues to line up along the fence at a time.

As each queue steps off to begin their trail walk, the line will pass our one man band and the firepit. They will be able to enjoy the fire and live music until it is their turn to begin. They will then walk over with the greeter who will reiterate the safety guidelines and expectations. When the trail walk is completed, guests will be reminded to return to their vehicles and exit the parking area to ensure that there is no overcrowding.
